

RGB/HD15 to 3-RCA COMPONENT VIDEO BREAK-OUT CABLE (CC2261 SERIES CABLES)

Application Guide:

- a) Use this cable with any DVD, game console, satellite & cable TV set-up box, and A/V receivers with component video output to connect to HDTV's RGB 15pin video port.

- b) Use this cable with any computer equip with video card that have 9pin output port. The video card usually include's a 9pin to 3-RCA component video adaptor.

Do not use this cable to connect your computer's VGA 15pin video port to your HDTV's component video input port. To do this, you need a converter called "PC to TV Converter".
