USB 2.0 ACTIVE EXT. CABLE
BUILT-IN 16FT CABLE, EXTENDS UP TO 80FT
(SKU: USB2-RPTRMC)

Application Guide:

a) Before using the USB repeater, install the software driver
   required for the USB device including printer, scanner, video
   cam, etc. by connecting it directly to the computer.
   Once installed and tested, un-plug the device.

b) Connect the USB repeater into computer's USB port and let
   it installed the required software. The software is built-in into
   computer's operating system.

c) Connect the USB device into USB repeater.

Up to 5 repeaters can be connected to extend USB reach up to
80ft. When used with USB bus-powered devices (these are USB
peripherals without their own power supply) and the repeater
can't supply the required power, connect a USB powered-hub
at the end of the repeater. If you have any question or need any
