

QVS® POWER BANK

Charges mobile devices anywhere, anytime

- 1) LED Flashlight
- 2) Power Button
- 3) Battery Status Lights
- 4) Input Charging Port (Micro-USB)
- 5) Output Charging Port: 1 Amp USB

Works with

-Most electronics meant to be charged from a USB Source

-iPad, iPhone, iPod

-Most tablets, smartphones, cell phones, Mp3 & Mp4 music Players, game players & GPS units, including Apple, Blackberry, HTC, Kindle, LG, Motorola, Nokia, Nook, Samsung phones, & Sony

Charging the Power Bank

-Use the included Micro-USB connector + cable, or use any standard Micro-USB cable.

-Connect to the IN Port on the side of the Power Bank.

-Use AC adapter or any other USB Power source.

-Charging begins as soon as power is supplied to the IN port.

-Charging is complete when all 4 status lights are lit (not blinking).

A Full charge takes (Approx):

4-5 hours with 1 amp AC adapter

8-10 hours with 0.5 amp supply (computer USB port)

Other ways to charge the Power Bank:

-Car Charger (USB charger that plugs into your car's dashboard)

-Computer USB Port (usually much slower)

Charging Your Devices

-Connect your device to the OUT port.

-The battery pack should automatically charge once plugged in.

-To stop charging, disconnect the cable. Automatic shut-off occurs after 20 seconds.

You can use any standard USB cable designed for your device.

Note: When charging Samsung Tab tablets, "X" may appear on the battery icon even though it is charging.

Capacity to charge various devices:

Here are some examples of charging capacity.

Numbers are approximate.

HTC One 1½ full charges

iPad 2 44% of one charge

Charging Capacity will diminish gradually with age.

Status Lights

The 4 blue status lights show approximately how full or drained the Power Bank is. When the Power Bank is off, check battery status by pushing the power button once.

-4 lights: 90-100% full

-3 lights: 70-90% full

-2 lights: 40-70% full

-1 light: 0-40% full

-No lights: fully drained

While the Power Bank is charging another device, the status lights will be less accurate, indicating a lower than actual battery level.

Shut-off

Auto shut-off after disconnecting cable and turning off light.

Flashlight + LEDS

Push power button to turn flashlight on and to see status LEDS.

Push one more time to turn off.

Specifications

Input: 5 volts DC - 1.5 amp maximum

Output: 5V, 1 A

Battery: lithium-ion 4800 milliamp hours (mAh)

Weight: 4.1 oz

USB Cable

Please note the USB cable included is only for charging. Do not use for data.

Safety Precautions

-Mistreating the lithium-ion battery pack can cause fire, explosion and chemical harm.

-Avoid temperatures above 140 F (60 degrees C).

-Don't place it near stoves, fire, or other high temperature locations.

-Do not try to open or disassemble the Power Bank.

-Do not drop on a hard surface.

-Stop using the charger if it is deformed, hot, or emits a smell.

-Avoid wet locations.

-When charging the Power Bank with AC power, use care to prevent electric shock.

-Don't touch the metal prongs when plugging or un-plugging. Do not use in damp conditions or with wet hands.

Standards Compliance

Disposal

This battery pack contains lithium-ion batteries and electronic circuitry. It should be recycled according to your local regulations and recycling facilities. The entire Power Bank should be recycled. It is not safe to remove the batteries yourself.

Li-ion
