# CAT5E/TELCO

RJ45/350MHZ SPLITTER CABLE

(SKU: C5YMFF | REV3) MANUAL V3

Applications Guide:

This RJ45 Y Splitter has multiple applications including

a) When used as RJ45 port splitter, **only one connection must be active at a time**. This is not an ethernet switch/hub splitter.

b) The RJ45 female port accommodate both RJ45 and RJ11/12 connection. When used as phone splitter, the phone wall jack must accommodate both RJ45/RJ12 connection.

c) When two C5YMFF are used in pair, it will allow two network connection over one cable drop (see reverse for instruction).

This RJ45 splitter cable have straight-thru pin-out configuration.

Network Pair Splitter Instruction Guide:

You must have LAN/ethernet knowledge and tools like RJ45 crimp tool & LAN wiring tester. Otherwise, please consult your LAN/network administrator.

REQUIREMENTS:
This application requires 2pcs of C5YMFF, 2pcs of standard ethernet cable and 2pc custom ethernet cable.

All standard ethernet cable and in-wall CAT5e cable must be fully-wired & have straight-thru pin-out with all 8-wires connected.

Make sure to properly connect the custom ethernet patch cord. Both computers may need to be plug-in for this application to work.

Please visit our website for the latest version of this manual.
